

Codebook for “*Women’s Representation and Corruption: Evidence from Local Audits in Mexico*”

The following codebook presents the description of the variables included in the datasets used in the empirical section of the paper and the replication materials. Datasets compile information on audits, elections, and municipality characteristics for Mexico (2000-2019).

Datasets:

1. *election_models.dta*. Municipality-year level data used for the models that predict whether a woman won the election with occurrence of audits and recent revelations of corruption.
2. *spending_irregularities.dta*. Municipality-year data on audit results to the sample of audited municipalities.
3. *women_in_election.dta*. Data on the number of women candidates running in a municipality-election.
4. *inegi_municipality.dta*. Municipality time-varying covariates. Used for the balance table (see Appendix part 1.R).
5. *reelection_DID_subset.dta*. Subset used to run the difference-in-differences models in the appendix (see Appendix part 2.do).

Election models

Indicator	Description
<i>state</i>	State name
<i>state_ID</i>	Mexican states [1-32]
<i>cve_inegi</i>	INEGI municipality code
<i>mun_ID</i>	Municipality unique ID
<i>year</i>	Year [2000-2019]
<i>mun_names</i>	Municipality name
<i>elected_mayor_female</i>	Woman elected as mayor 1 = Woman 0 = Man
<i>current_mayor_gender</i>	Gender of mayor in office that year 1 = Woman 0 = Man
<i>party_winner</i>	Party of mayor that won the election PAN, PRI, PRD, PAN-PRD, Morena, or Other.
<i>incumbent</i>	If same party won the last election = 1, 0 otherwise
<i>audit_year</i>	Audit conducted that year
<i>previous_audits</i>	Count of previous audits
<i>l_audit_year</i>	Audit in the past year
<i>l_audit_2yr</i>	Audit in the past 2 years
<i>l_audit_3yr</i>	Audit in the past 3 years
<i>l_prev_audits_ever</i>	If the municipality has ever been audited
<i>prev_audit_1yr</i>	Audit conducted in past year, irreg>0
<i>prev_auditreleased_1yr</i>	Audit released in past year, irreg>0
<i>prev_audit_3yr</i>	Audit conducted in past 3 years, irreg>0

<i>prev_auditreleased_3yr</i>	Audit released in past 3 years, irreg>0
<i>irreg_adj</i>	Total amount of irregularities (adjusted for inflation, base=2019)
<i>l_irreg_adj</i>	Last known irregularities (t-1)
<i>universe_adj</i>	Total amount of FISM resources (adjusted for inflation, base=2019)
<i>sample</i>	Portion of the universe inspected by auditors
<i>lpop</i>	Population (log)
<i>population_tot</i>	Total population in municipality
<i>HDI</i>	Human Development Index
<i>margin</i>	Margin of victory in the last election
<i>volatility</i>	Petersen Volatility Index [0-100]
<i>usos</i>	“ <i>Usos y costumbres</i> ” municipality
<i>election_year</i>	Election year
<i>parity_req</i>	If there are any parity requirements in state legislation 1 = Parity requirements 0 = None
<i>female_pop</i>	Total population of women in the municipality

Models for spending irregularities

Indicator	Description
<i>state</i>	State name
<i>state_ID</i>	Mexican states [1-32]
<i>cve_inegi</i>	INEGI municipality code
<i>mun_ID</i>	Municipality unique ID
<i>year</i>	Year [2000-2019]
<i>mun_names</i>	Municipality name
<i>gender</i>	Gender of the current mayor 1 = Woman 0 = Man
<i>party</i>	Party of the mayor PAN, PRI, PRD, PAN-PRD, Morena, or Other.
<i>incumbent</i>	If same party won the last election = 1, 0 otherwise
<i>irregularities</i>	Total amount of irregularities found by auditors
<i>irreg_adj</i>	Total amount of irregularities (adjusted for inflation, base=2019)
<i>l_irreg_adj</i>	Lag of adjusted irregularities (t-1)
<i>ln1_irreg_adj</i>	Log + 1 of adjusted irregs
<i>irreg_sqrt</i>	Sqrt of adjusted irregs
<i>universe_adj</i>	Total amount of FISM resources (adjusted for inflation, base=2019)
<i>sample</i>	Portion of the universe inspected by auditors
<i>previous_audits</i>	Previous audits
<i>l_prevaudits</i>	Previous audits (t-1)
<i>election_year</i>	Election year
<i>HDI</i>	Human Development Index

<i>lpop</i>	Population (log)
<i>margin</i>	Margin of victory in the last election
<i>volatility</i>	Petersen Volatility Index [0-100]
<i>parity_req</i>	If there are any parity requirements in state legislation 1 = Parity requirements 0 = None

Women in elections

Indicator	Description
<i>cve_inegi</i>	INEGI municipality code
<i>year</i>	Year [2000-2019]
<i>woman</i>	Number of women as candidates in the municipality election
<i>total</i>	Total number of candidates in the municipality election
<i>per_women</i>	Percent of women as candidates in the municipality election

INEGI indicators

Indicator	Description
<i>cve_inegi</i>	INEGI municipality code
<i>mun_name</i>	Municipality name
<i>year</i>	Year [2000-2018]
<i>totalpop</i>	Total population in the municipality
<i>ratio_men_women</i>	Total amount of irregularities (adjusted for inflation, base=2019)
<i>average_schooling</i>	Average schooling
<i>water_index</i>	Access to water index
<i>sewage_index</i>	Access to sewage index
<i>electricity_index</i>	Access to electricity index
HDI	Human development index

Municipality indicators

Indicator	Description
<i>state</i>	Mexican states [1-32]
<i>cve_inegi</i>	INEGI municipality code
<i>year</i>	Year [2015-2016]
<i>gender</i>	Gender of the current mayor 1 = Woman 0 = Man
<i>irreg_adj</i>	Total amount of irregularities (adjusted for inflation, base=2019)
<i>treat_16</i>	Reelection treatment group indicator 1 = States with reelection in 2016 0 = States without reelection as of 2016
<i>period</i>	Period dummy variable 1 = Post-treatment (2016) 0 = Pre-treatment (2015)
